14 September 1960

MEMORANDUM FOR THE RECORD

I took a telephone call referred from the Director's office of a man who says his name is George Lynch and that he is with HCUA. He stated that he had been asked by Mr. Tavenner to request a look at our regulations and directives pertaining to personnel security. He said he wanted to do this on an informal basis and would like to sit down with us and look at the papers. I said there was a problem involved in that all or most of the regulations concerned were classified and I could not agree to release them for an inspection without the Director's approval. He said he understood and that he thought he would not want to see classified material. I said I would check into the classification of the regulations and ask for appropriate guidance from the Director's office and be back in touch with him when we had answers to these points.
